## ISO 14065

*AWT follows the guidelines associated with ISO 14065--a standard that provides clear and consistent specifications for quantifying, monitoring, reporting and verifying GHG emission offsets*

*AWT is experienced with a variety of GHG verification and offset protocols including:*

- ❖ *Chicago Climate Exchange*
- ❖ *California Climate Action Registry*
- ❖ *RGGI*
- ❖ *Voluntary Carbon Standard*
- ❖ *The Gold Standard*
- ❖ *AgRefresh*
- ❖ *C-Lock*

## Company Profile

*Founded in 1984, AWT is a full-service professional engineering & consulting firm, specializing in environmental management. AWT has been providing engineering, agronomy and consulting services, with extensive expertise in manure systems engineering and nutrient planning to residential, industrial, municipal and commercial clients nationwide.*

*AWT's diverse and highly-skilled staff boasts 75 years of combined experience along with diverse educational backgrounds and continual industry related training.*

*This diverse staff includes: professional engineers, licensed soil scientists, agronomists, GIS/GPS computer mapping technicians, irrigation designers and subsurface waste system operators.*

## Third-Party Verification

*AWT has been providing independent verification to agricultural clients and carbon offset project developers nationwide. As a verifier, AWT provides independent third-party review of project reports, maintenance of project activity and attests to the accuracy of the data.*

*AWT is currently pursuing accreditation for:*

- ❖ *Chicago Climate Exchange*
- ❖ *California Climate Action Registry*
- ❖ *Voluntary Carbon Standard*
- ❖ *The Gold Standard*
- ❖ *RGGI*
